

Test Certificate

for the solvent

”A 1310-UV”

of the company

ANCHOR PRESSROOM PRODUCTS

The wash ”A 1310-UV” was tested by Fogra according to the following evaluation criteria as specified by Koenig & Bauer AG, Planeta - Bogenoffset:

- Chemical resistance of wash-up, plate dampening and inking rollers, printing blankets, materials used for hoses and seals, material of printing press parts which are in direct contact with the detergent and printing plates.
- Miscibility with water and hydrocarbons,
- Flash point (with a flash point of more than 55°C the detergent is harmless concerning technical safety),
- Residues remaining after evaporation.

This test certificate is valid for sheet-fed machines equipped with material that is only suitable for UV printing. It is only valid for the chemical composition which was presented to Fogra on 5th March 2007.

The legally binding approval of the above mentioned cleaning agent is given electronically and its up-to-date version is available in the form of the approval list on Fogra’s website (www.fogra.org).

This test certificate refers to presses which are suitable for printing with UV inks only as well as to presses which are suitable for printing with both UV and conventional inks.
